

vision_utils_tests

vision_utils_tests is a [ROS](#) package to test the package vision_utils.

How to install

Dependencies from sources

Dependencies handling is based on the [wstool](#) tool. Run the following instructions:

```
1 $ sudo apt-get install python-wstool
2 $ roscd ; cd src
3 $ wstool init
4 $ wstool merge `rospack find vision_utils_tests`/dependencies.rosinstall
5 $ wstool update
```

Dependencies included in the Ubuntu packages

Please run the `rosdep` utility:

```
1 $ sudo apt-get install python-rosdep
2 $ sudo rosdep init
3 $ rosdep install vision_utils_tests --ignore-src
```

Build package with Catkin

```
1 $ catkin_make --only-pkg-with-deps vision_utils_tests
```
